This is an award issued through the Landscape Horticulture Department. This is not a formal certificate given by Merritt College or the Peralta Community College District. However, earning this award indicates a high level of knowledge and proficiency in pruning and related subjects. The Landscape Horticulture staff will verify completion of required classes. The applicant must keep track of when fee-based classes were completed. This will facilitate the verification process, as these classes are not listed on student transcripts as academic classes are. You must also be able to document your experience. Please email (preferred) or call (510) 436-2418 for further information.
