EXPLORE

Do you want to learn about microscopy?

The Merritt College Microscopy Program offers **project-based lab classes** that will expose you to cutting-edge digital imaging systems that are widely used in biological microscopy. You will learn about a variety of **job opportunities** in the biomedical fields, how to take beautiful images, and complete fun projects **customized to your career interests** and experience level.

MERRITT COLLEGE

MICROSCOPY PROGRAM

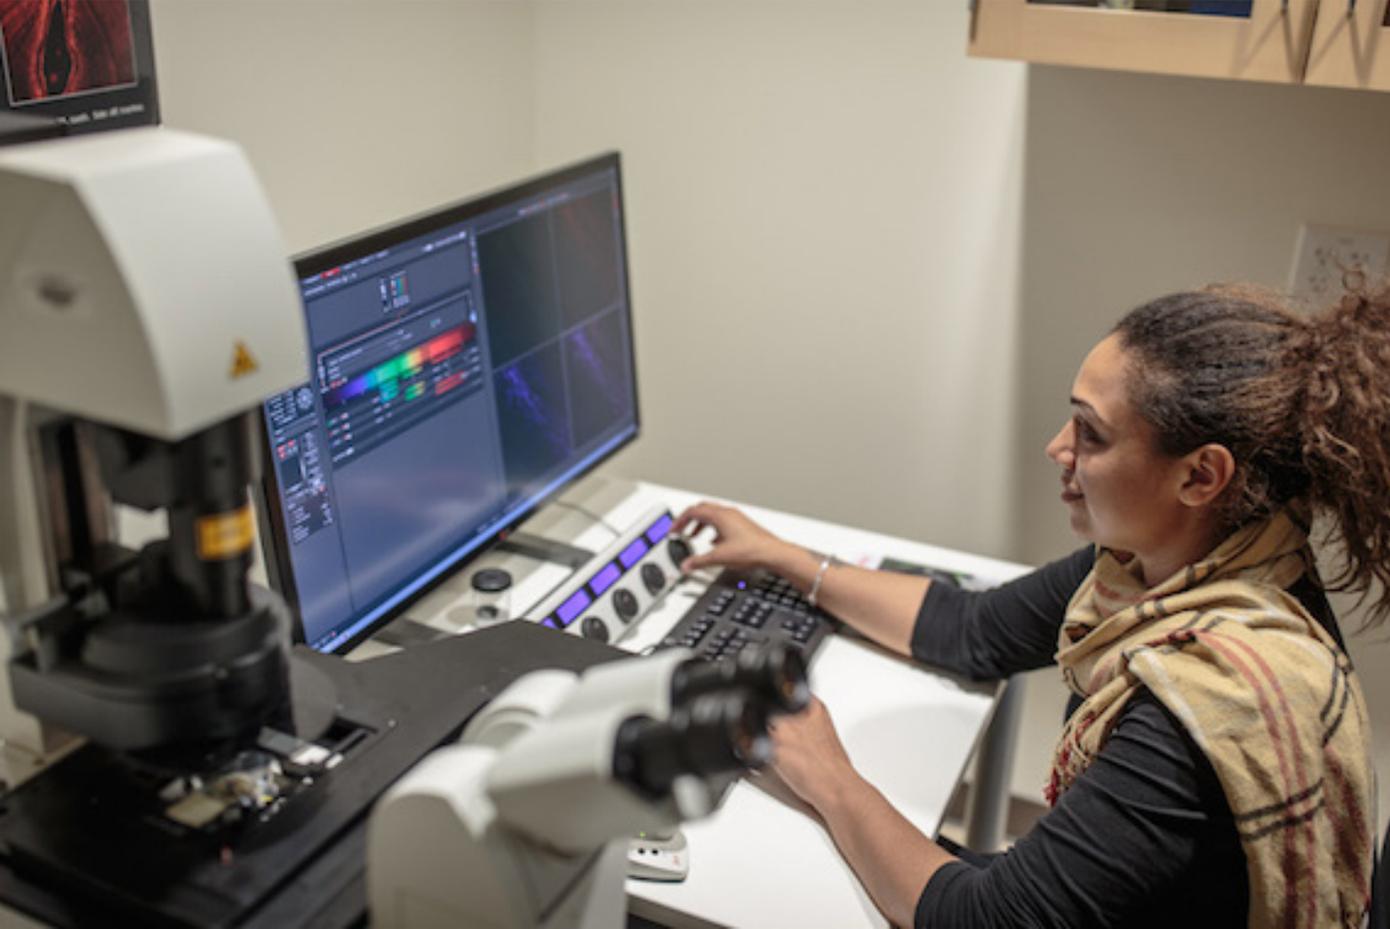

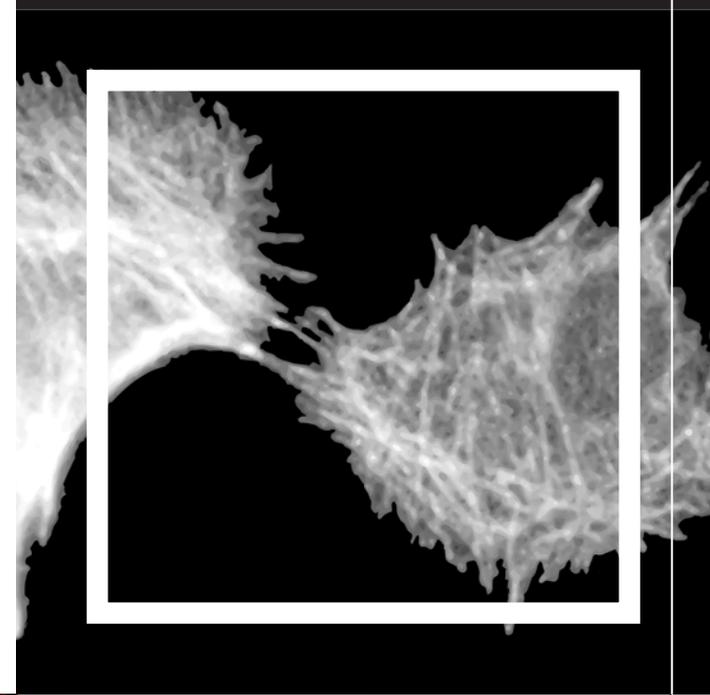

NIGHT & WEEKEND COURSES

WORK

Our training allows access to paid employment in rapidly expanding fields. We help you obtain work experience in your targeted career field. **We have many standing internships** at local academic research labs, as well as a partnership with a rainforest research station in Costa Rica.

LEARN

We have an amazing array of state-of-the-art microscope imaging systems to train you on. Our courses are transferrable to other colleges and universities. You can obtain a **Certificate in Optical Microscopy** in less than a year. We also offer a Certificate in Fluorescence Bioscience.

CONNECT

The curriculum is developed in connection with local industry and academic leaders. Our instructors have extensive backgrounds in biomedical research and Ph.Ds in Biology.

Free tutoring and financial aid is available for students.
