

Take the path to a greener future.

Join the Natural History & Sustainability Program
at Merritt College

The Natural History & Sustainability Program is for Everyone

We all breathe the same air and drink the same water. We have one planet, one environment, one chance to get it right. Be part of the solution with Merritt College's interdisciplinary program that combines a variety of nature-related courses to educate students about the biodiversity and natural resources of the Bay Area. You will learn how to identify plants, test water quality, evaluate environmental policy, plan parks, and much more. Our goal is prepare you for a career in the environment or transfer to a four-year environmental program. We welcome all students in an inclusive and equitable way with the common goal of helping to ensure nature's long-term future.

Courses, such as...

Landscape Horticulture
Environmental Justice
Geology
Park Design
Agroecology
Permaculture
Conservation
Environmental Management
Nutrition and Food Production

Career possibilities...

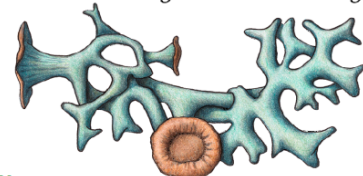

Park Ranger
Environmental Consultant
Naturalist/Interpreter
Urban Farmer
Field Technician
Water Quality Technician

Certificates (in development)...

Conservation & Resource Management
Natural History & Resources
Urban Agroecology
