

## Beauty and the Feast Internship

Beauty and the Feast LLC is a design, installation and maintenance landscaping company, specializing in creating native plants and edible gardens, to provide habitat for humans and other beings.

We are offering an internship for people interested in learning more about horticulture or urban agriculture, and who are interested in landscaping maintenance, plant care, native plants and Permaculture/food crops.

This internship is a physical job, so one needs to be able to lift and carry at least 40 lbs and work for 5 to 8 hours, outside. Having your own transportation is a plus, but we can also coordinate to meet at BART or at the work site. We often meet at my house and carpool to clients.

We usually have client work Tuesday through Thursday. Sometimes Monday or Friday, when we need to complete projects. Most days vary from 5 to 8 hours.

Interns would work with me, and up to 4 other workers, depending on the project.

Work days vary from general maintenance in gardens, such as weeding, pruning and fertilizing, to projects that include sheet mulching and planting. Additionally we do hard scaping, which includes patios, retaining walls and raised beds.

Work is scheduled based on clients' needs and available workers. Hours are flexible, and I will try to schedule an intern based on their availability.
