

Urban Farmer Assistant for Home Garden and Orchard, San Leandro

Monthly help needed for the development of an urban garden. Over the past 5 years I have been developing a 50 x 200 foot property as an aesthetic as well as productive garden. I currently need someone to design and help implement a greenhouse as well as continue the development of the garden. There is a mix of native and nonnative plants and several native trees that are over 60ft high, offering a challenging but interesting horticultural landscape. Applicants should have knowledge of landscape horticulture, edible landscaping, garden construction and permaculture principles. Your ideas for improvements and innovation are welcome and you can develop an area of the garden for your own use. Offering \$100/month for 4-5 hours of work.
