

# Entomology and Molecular Genetics Paid Internship

Our team in the Center for Comparative Genomics at the California Academy of Sciences is seeking enthusiastic students looking to gain valuable experience in a molecular laboratory while contributing to an ambitious project aiming to document the biodiversity of California's native insect species. This internship is a 10-month paid part-time internship starting in the Spring of 2024.

This internship is an amazing opportunity to build new skills, expand your knowledge and make connections in the field of science!

-  Paid internship working 10-20 hours/week
-  Gain skills in DNA extraction, PCR, gel electrophoresis, and more
-  Work with museum specimens
-  Make connections with scientists
-  Explore your passion
