

Program Review Validation Curriculum Committee

Program Title:

Criteria 1: Completeness

Is the Curriculum page complete (i.e., all three sections filled out)?

Yes No

If not, why not? Comments:

Criteria 2: Curriculum Review

All of the courses in your program should be auto-populated, but you only have to report on the courses scheduled for review in 2018 as indicated in your [curriculum review plans](#). You do not need to report on courses and programs scheduled for review in 2019 and 2020. Ignore the “Last updated date”, and for each of these courses, indicate the semester and year when it was reviewed. If a course has not been reviewed, indicate when it will be reviewed. For your programs, add an item and type the name of each program, then indicate when it was reviewed or will be reviewed (if it wasn't).

Have all courses or programs scheduled for review in 2018 been reviewed?

Yes No

Comments:

Criteria 3: Curriculum Planning and Development

What long-term ideas or plans do you have for the overall curriculum of your department or program over the next three years? Are you creating, significantly changing, or getting rid of curriculum?

Does the program have a long-range plan for developing its curriculum? Yes No

Comments:

Criteria 4: Improvement Actions and Resource Requests

Did your curriculum review lead to any specific proposals for improvement and do those proposals require additional resources? Be sure to specify what course or program reviewed is the basis for the resource request in the Description/Justification field.

Are resource requests directly related to the results of curriculum review? Yes No
