

SLO assessment
CurriQuNet Template

Please complete the following sections at the beginning of the semester.

Course being assessed: _____

Year and Semester: _____

Which SLO is being assessed: _____ (primary wording of SLO or #)

What assessment method will you use? (describe in detail. If exam, list the specific question(s) being asked that align with the SLO. If assignment, describe and attach a copy.)

What are your expectations for students? (How many points/% do you expect students to score to show they have met the outcome? What components of the questions must they include?

Ex: Assignment is worth 30 points. 20 of those points are related to the students ability to critically analyze and communicate the information: 10 pts for answering questions, 6 for critique/reflection and 4 for summarizing study in their own words. Expectation is that students are scoring at least 16 out of 20 in these 3 areas.) Please include a copy of your scoring rubric if for an assignment.

Once assignment/exam has been graded, complete the following questions.

How many students are in the class? _____

How many were assessed? _____

How many met your expectations? _____

What were the results of the assessment? What is your evaluation of these results?

What gaps in learning were identified? Where are students struggling?

What actions can be taken to address these gaps at either the course, department, or college level?

When will you next assess this SLO? (must be within the next three years)
